

# Sprint plan 3

Context Project: Health Informatics

Group: HI4

User Story	Task	Task Assigned To	Estimated Effort per Task
The user wants to see the output of the data analysis before writing it to file	<ul style="list-style-type: none"> <li>- Link the writer with the GUI</li> <li>- Extend the output module for the output of the three implemented C's</li> </ul>	Remi Elvan	2 Hours 2 Hours
The user wants to perform transformations on the raw data (the eight Cs) using a scripting language	<ul style="list-style-type: none"> <li>- Construct a basis for the scripting language                             <ul style="list-style-type: none"> <li>- Chunking</li> <li>- Constraining</li> <li>- Converting</li> <li>- Commenting</li> <li>- Coding</li> <li>- Computing</li> <li>- Connecting</li> <li>- Comparison</li> <li>-</li> </ul> </li> <li>- Extend the chunking operation</li> <li>- Extend the constraints operation with nested filtering on binary operators</li> <li>- Extend the commenting operation by letting the user add comments manually to a generated data block</li> </ul>	Hans Sven Remi Elvan Matthijs Sven Sven Elvan  Hans Elvan  Matthijs	2 Hours 2 Hours 2 Hours 2 Hours 2 Hours 2 Hours 2 Hours 2 Hours  6 Hours 5 Hours  5 Hours

The user wants a simple and easy to grasp graphical user interface	<ul style="list-style-type: none"> <li>- Improve the current GUI based on feedback of Wenxin: change analysis tab and give the operations more intuitive names</li> </ul>	Remi	1 Hour
The user wants to enter scripts in the program, which can be executed on the selected data	<ul style="list-style-type: none"> <li>- Further implementation of GUI for writing scripts (script editor)</li> <li>- Add transformations screen to the GUI in which the user can select the preferred transformation (optional)</li> </ul>	Remi Remi	5 Hours 2 Hours
The user wants a more convenient product planning and emergent architecture	<ul style="list-style-type: none"> <li>- Improve Product Planning based on feedback</li> <li>- Update Emergent Architecture based on feedback of the initial version</li> <li>- Extend Emergent Architecture (ch 2 and ch 3)</li> </ul>	Elvan Sven Sven	2 Hours 1 Hour 2 Hours
The user wants the datafiles to be analysed and presented in sequential order	<ul style="list-style-type: none"> <li>- After linking, let the data be processed in a sequential data structure (transform RecordList into TreeMap)</li> <li>- Create a way to transform different datums into one general datum (to group datums by day/week/year)</li> </ul>	Hans Sven	4 Hours 3 Hours
The user wants to select what kind of data is in each column	<ul style="list-style-type: none"> <li>- Give the user the option to specify the kind of data in each column (e.g. integers or strings)</li> <li>- Store the data in the format as specified by the user</li> </ul>	Matthijs Matthijs	2 Hours 1 Hour
The user wants the programmers to have a good vision for whom they are developing	<ul style="list-style-type: none"> <li>- Create a persona of the target customer</li> </ul>	Matthijs	1 hour

## Remaining Tasks

(non-sprint related tasks that are not mentioned above)

- Acceptance testing with Wenxin Wang

On Wednesday we are going to meet with Wenxin to get her feedback on our Product Planning and the writer component of the GUI.

- Extra room for flexibility

We left two hours room for each group member for flexibility.
